Pipe Lining & Coating Pty Ltd
53 Gardiner Street
Rutherford NSW 2320

Attention: Mr Charles Russell/ Mr Troy Flower

To whom it may concern,

Re: Pipe Lining and Coating Pty Ltd (PLC)

I confirm that I have dealt with Pipe Lining and Coatings since 2000, during which time they have provided excellent support in the areas of pipe fabrication, design advice and general technical support for my organizations.

Most recently they have played a major supplier role for the Water Delivery Alliance (WDA), an alliance between Sydney Water, Bovis Lend Lease, McConnell Dowell, KBR, Worley Parsons and ERM, who successfully delivered the design and construction of the \$650 million Sydney desalination pipeline on time and on budget as part of the \$1.5 billion Sydney Desalination Project

Pipe Lining & Coating Pty Ltd (PLC) supplied all the 1800 mm diameter internal cement lined bends and fittings, a substantial length of 1800mm diameter internally and externally coated pipe, a critical part of the externally coated 1400mm diameter marine crossing pipe when another supplier failed to perform and cement lined 14 km of 1400mm diameter pipes for the marine crossing of Botany Bay. This last item was carried out in a purpose built facility established by PLC in Port Kembla south of Sydney using their mobile cement lining plant. All cement lining was done in accordance with Australian Standard AS1281 and the WDA project specification.

All of PLC's work was of appropriate quality and was delivered to meet our schedule requirements to the Alliance's satisfaction.

What distinguishes PLC out as a superior supplier is their willingness to support the customer in getting a "best for Project" outcome, often going far beyond the commitments required by their Contract to ensure they have done everything they can to meet the customers requirements.

I can confidently recommend Pipe Lining and Coating as a solid and reliable supplier, and experts in their field.

Yours sincerely

Craig Nichelsen
